Without much activity prices at the First Boar ruled about as on Saturday. After the Board ther was a better feeling with some transactions in Eric and at the Second Board the market was stronger with more disposition to buy. The non passage to the army appropriation bill checked the buoyane, somewhat, but the market was assisted by the belief that under the bills which have been passed, the Sub Treasury will be seriously depleted and the Bank strengthened. The passage of the California Was Debt bill alone will draw out about a miltion, nearly all from the depository in this city. This appropria tion was made two years ago, but from some deficiency of vouchers the Secretary has declined to make th disbursements. The present bill authorizes him to pay the amount, about \$980,000 to the Com alissioners of California without further delay. A considerable portion of the buying to day was by shorts. Eric closed at 59 [# 59], an improvement of † # cent from the lowest point of the day. Reading was scwsel after being est, and Central scwsel, having sold at 85%, buyer sixty. Pennsylvania Coal sold at 95, and Delaware and Hudson 119, buyer sixty. In Western shares there was a fair business done, and at the close the market was firm. Hinois Central was in demand at 100 for foreign account. The aggregate of orders here for this stock is large, but generally limited too low for execution. The letters by the steamer bring accounts of sales in London equal to 112] here, but the closing under advices of a lower merket on this side were not equal to 1101 here. Cleveland and Toledo was 721; Michigan Southern, 87]; Michigan Central, 89]; Rock Island, 91]; Galens, 107 &c. In Railroad Bonds there is not much doing. Illinois Centrals sold at 91; New York Centrals at 1021; Hudson River 1st Mortgage, 100, &c.

The business of the Clearing House was \$25,631,000. The Wednesday's steamer will take out in the neighberhood of half a million of Gold, but the amount car not now be ascertained with any exactness, as it will depend upon the sales of bills to-morrow. One amount of \$150,000 will probably be countermanded, and bills

remitted instead. The business of the Sub-Treasury was: Paid on Treasury account, \$71,267 74; received on Treasury account, \$230,190, including \$75,000 for transfer drafts on Beston; balance on Treasury account, \$10,118,355 8; paid for Assay Office, \$10,779 66; paid on dis-

bursing checks \$13,487 95. The following is a list of the newly elected members of the Toledo, Wabash and Western Raticoad:-A. Bordy, New York: A. H. Tracy, Buffalo; H. Pumpelly, Albany; J. F. A Sanford, J. B. Varnum, E. Whitehouse, E. C. Lichfield and A. Rodewald, New-York; R. Sage, Troy; M Johnson and William Baker, Toledo: A. S. White and James Speares, Lafavette: George Cecil, Logansport; and Reid Case, Lafayette. The first meeting of the new board is to be held at the office of Messrs. Whitehouse, Son & Morison, on the

27th inst. The business in Land Warrants is not large, Thempson's Bank Note Reporter quotes as follows:

The Valley Bark of Maryland, which exploded a week or two ego has passed into the hands of a Receiver, Mr. Roman, President of the Bank of Hagerstown, Maryland. The uncurrent money brokers of this city hold about \$40 000 of the notes of this Bank. and the public \$80,000 to \$100 000 more. We are on ewhat curious to see the statement of assets. The circulation was issued here under very respectable auspices, and helders would do well not to sacrifice notes.

The advices by the Baltie have had an unfavorable effect upon Breadstuffs. Flour has fallen off 10 to 15c. P bbl., and Wheat is also considerably lower. Corn is also weaker. In Provisions there is not much change, but the market is heavy. Groceries are quiet, and Sugers are selling slowly at a lc. decline from the highest point. The sales of Wool for the week are 450,000 lb, the particulars of which will be found in our market report.

We hear of a few orders for American Securities by the Baitic, some of which can be executed. The private letters are cheerful and do not quote the moneymarket quite as stringent as the printed accounts. The prospects of a very favorable harvest, always a subject of the first importance in England, gives great confidence to business men Advices have been received that the \$250,000 New York Central Bonds, the ate issue, which were sett to London, were immedistely placed and the remainder will probably go forward.

The figures of the Bank Statement show a general contraction. The loss of specie is rather less than was anticipated, and the Banks have probably to day rather nore in vault than the average given in the statement. Notwithstanding the demand from the regular customers of the Banks for discounts, the loans have decreased about \$800,000, nearly all from the withdrawal of call-loans. The line is now something over a million below the highest point. In deposits the neminal decrease is about \$1,200,000, but allowing for the smaller business of the Clearing House, the de Deposits, Aug 9. \$93,220,009

Daily News says:
"The increased velocity with which the current of the precious metals i as lately set toward India, will be best shown by a recapitulation of the total exports from England by the eastern steamers during the last five years. These remittances amounted in 1851 to £1.818.380 in 1852 to £3.551.977 in 1853 to £5.590. 867, in 1854 to 14 300,302, and in 1855 to 17,354,161. In the present year they are proceeding at the unprecedented rare of nearly ten millions and a quarter stering per annum."

stering per annum.

The influence exercised upon the European money markets by the flow of silver to the East being thus powerful, it would be particularly interesting if any reliable estimate could be formed as to the except of the capacity of India to absorb silver. He must be a told man, however, who will venture upon positive assertions on this point. From time immemorial Incise has been notoriously a complete sink of the precious metals. in One from Thompson's Reporter:

The Ohio Legislature, at its late session, passed another double-headed Banking law. This law is to be approved or disapproved by the people at the election in October. It provides for a safety-fund system of branches, all governed and guided by a mother institution, called the Bank of Ohio.

This mother sees that the branches of the Bank of

Obio pay up their capital, and organise properly; issues to them choulating rotes, all signed by the President and Cashier of the mother; receives and manages the safety-fund which is ten per cent on the circulation and can stablish a clearing house in Columbus, or a reden ption office in New-York.

redenption office in New-York.

Branches can be started without limit on a capital of \$100,000-50 P cent paid up—except in the following counties, where the capital must be: In Hamilton, \$300,000, and in Cuyahoga, Montgomery, Frankins and Lucas, \$300,000, with 50 P cent paid up. Every branch must have not less than five nor more than seven Directors—all residents of Ohio.

Twenty P cent only of their circulation can be in \$1, \$2 and \$3 notes. Fifeen P cent of the circulation must be kept in coin, and 15 P cent more in its equiv-

at, 22 and 23 hotes. Find a vector of the circulation must be kept in coin, and 15 P cent more in its equivalent—deposits subject to sight drafts to Boston, New-York, Philadelphia or Baltimore, being more an equivalent. Branches must make monthly reports,

Circulation can be issued on capital as follows:

On the first \$100,000 capital pail up 2 to 1.

On the second \$100,000 capital paid up, 14 to 1.

On the furth \$100,000 capital paid up, 14 to 1.

On all capital above \$400,000 paid up, 1 to 1.

The mother can call for more when the safety-fund is diminished by failures. All branches must take each other's issues at par for debts due.
